The Silk Road
 see https://commons.wikimedia.org/wiki/File:Silk_route.jpg
552 AD -1081AD

Armies and nations that were part of a land or sea route that constituted the Silk Road – from the original arrival of smuggled silk worms to Constantinople to the final official Byzantine embassy to China.

A number of Book 3 Lists only have Bge(O) therefore all lists have the following line added
 Assorted pack animals and porters Irr Bge (F)@ 2AP 0-6

All armies listed as blue are part of a sea route and hence must include ½ max of total naval available rounded up.

Defenders may pick a S or WW from their list if they so choose.

A WW will count in all instances (other than its dimensions) as an S (so Galleys S and X may be used on them)

Foreign allied contingents may only be drawn from a valid province/region unless stated otherwise.
